PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

To: MARCINSKA, Aleksandra Kancelaria Patentowa Aleksandra Mar NOTIFICATION OF TRANSMITTAL OF ul. M. Dabrowskiej 9/57 THE INTERNATIONAL PRELIMINARY PL-01-903 Warsaw **POLOGNE** WPŁYNĘŁO REPORT ON PATENTABILITY (PCT Rule 71.1) 2006 -04- 1 1 Date of mailing Kancelaria Patentowa (day/month/year) 04.04.2006 Aleksandra Marcińska Applicant's or agent's file reference DDU/04.02 IMPORTANT NOTIFICATION International application No. International filing date (day/month/year) Priority date (day/month/year) PCT/PL2004/000015 29.02.2004 17.12.2003 Applicant KULAKOWSKI, Henryk

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, claffty and support for the claims.

Certain defects in the international application Box No. VII

The following defects in the form or contents of the international application have been noted:

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/PL2004/000015

I. Basis of the report

The amendments in claim 1 defining "use of an SS7 signalling channel" or "the SS7 signalling for text interface" (see lines 5 and 18) go beyond the disclosure in the international application as filed, contrary to Article 34(2)(b) and 19(2) PCT (see also the PCT-Guidelines, chapter VI-20.9 to 20.19).

Consequently, the international preliminary examination report (Article 35(1) PCT) has been established as if the above amendment had not been made according to Rule 70.2(c) PCT.

- V. Reasoned Statement under Article 35(2) with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement
- 1. The following documents cited in the International Search Report have been considered in this report:

D1: US 2003/1 44016 AI (FINE ERAN ET AL) 31 July 2003 (2003-07-31) D2: US-A-5 943 611 (MOELNE ANDERS LENNART) 24 August 1999 (1999-08-24)

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 to 6 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document), according to the features of claim 1, a method of effecting a connection from user's phone terminal to a service in a telecommunication network (abstract), wherein the service can be accessed identically and simultaneously with the use of two complementary interfaces: a voice, using DTMF (paragraph [0077]) and a text interface using USSD commands (paragraph [0056]), where the service is called by a connection initiated by the user to the service access number in the telecommunication network (paragraph [0050], in particular lines 3 to 6), which in the

case of a voice interface is treated as a phone number (paragraph [0050] - lines 6-7 and paragraphs [0063]-[0064]), while in the case of the text interface is treated as a USSD command (paragraphs [0073]-[0074]), consisting of the same digit sequences, and differing only in the characters "*" and "#" (paragraphs [0073]-[0076]), included therein, and the decision on how this connection is to be handled is made by the service, basing on information related to the incoming connection (paragraph [0038]), received from the telecommunication network (from resolving server 24, paragraph [0053]).

Hence, document D1 already discloses all the features of claim 1, which therefore lacks novelty, contrary to Article 33(2) PCT.

Furthermore, even if It were argued that the subject-matter of claim 1 is novel, based on minor differences between the claimed and the known methods, it would not involve an inventive step, Article 33(3) PCT, especially as D1 addresses the same problem (application: see page 3, lines 6 to 10; D1: paragraph [0013]) and discloses the same type of solution as the present application.

Moreover, the above objections regarding novelty and inventive step could also have been raised in view of document D2 (see in particular column 6, lines 4 to 31 and column 9, lines 43 to 62).

Hence, in the light of the disclosure of D2, the subject-matter of claim 1 is neither new (Article 33(2) PCT) nor involves an inventive step (Article 33(3) PCT) and therefore claim 1 does not meet the requirements of Article 33(1) PCT.

- 3. The additional features set out in the dependent claims 2 to 6 do not seem to add anything which is both new and of inventive significance to claim 1, to which they are appended, taking into account the disclosure of the above cited documents DI and D2, as well as the general knowledge in the art.
 - Therefore, the features of claim 2 are already known from D1 (see e.g. paragraph [0063] or [0073]).
 - An SMS Interface, as in claim 3, is disclosed both in D1 (cf. paragraph 74) and in D2 (see column 9, lines 43 to 48).

The provision of connection to another user by accessing a server, as in claim 4, is directly derivable from D1 (see paragraph [0074]) and is disclosed in D2 (cf. column 1, lines 37 to 47).

The features of claim 5, as far as they can be construed, are also disclosed both in D1 (see paragraph [0061] in combination with paragraph [0073] or [0076]) and in D2 (cf. column 9, lines 43 to 48).

Finally, the features of claim 6 are disclosed in D1 (cf. paragraph [0036]) and D2.

Therefore, the dependent claims, either alone or in combination, cannot be considered to offer a basis for an inventive main claim.

VII. Certain defects in the international application

Independent claim 1 is not in the proper two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (D1) being placed in the preamble (Rule 6.3(b)(I) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).

Contrary to the requirements of Rule 5.1 (a)(ii) PCT, the relevant background art disclosed in the document D1 and D2 is not mentioned in the description, nor are these documents identified therein.

VIII. Certain observations on the international application

- The present application does not meet the requirements of Article 5 PCT because terms "identically" and "simultaneously" defining the service access are not clear and complete for the invention to be carried out by a person skilled in the art.
- 2. In addition, the applicant's attention is drawn to the fact that the use of expressions such as "preferably", as in claims 1 and 2, has no limiting effect on the scope of a claim, and therefore, the features to which such expressions refer are regarded as entirely optional (see PCT-Guidelines, Part II, 5.40).
